

# Test document for software entries

Inria Software Citation Working Group

December 26, 2025

This is a test document that showcases the possibilities for rendering the various software-related bibliographic entries with the standard BibLaTeX style extended with the `software` module.

- software entry CGAL [**cgal**] and Scilab [**delebecque:hal-02090402**]
- softwareversion entry CGAL 5.0.2 [**cgal:5-0-2**]
- softwareversion Scilab 1.1.1 : from the chain of crossrefs [**delebecque:hal-02090402v1**], and from the condensed bibitem [**delebecque:hal-02090402-condensed**] (they should be identical)
- softwaremodule entry Voronoi: from the chain of crossrefs [**cgal:lp-gi-20a**], and the from the condensed bibitem [**cgal:lp-gi-20a-condensed**] (they should be identical)
- software entry Parmap [**parmap**]
- codefragment entry simplemapper: from the chain of crossrefs [**simplemapper**], and from the condensed bibitem [**simplemapper-condensed**] (they should be identical)
- software entry from the Astrophysics Source Code Library, using the eprint field [**2013ascl.soft05002P**]
- software entry from the swMATH catalog, using the eprint field [**sw01091**]
- documentation in a software entry [**scilabdoc**]
- software entry [**sw-ipol.2020.300**] and related article [**ipol.2020.300**] from the IPOL journal
- software entry with addendum field [**parmap-addendum**]
